**Subject:** Application for Junior Engineer Position at Cornerstone Company

Dear Sir,

I am writing to express my keen interest in the Junior Engineer position at Cornerstone Company. Armed with a strong background in backend technologies (Java, advanced Java) and proficiency in frontend technologies (HTML, CSS, and JavaScript). My proficiency extends beyond the MERN stack (MongoDB, React, Next.js) encompassing SQL, Tailwind CSS, Bootstrap, and complementing my robust foundation in Data Structures and Algorithms.

In my journey as a web developer, I have successfully implemented diverse projects, including creating a grocery mart and Flipkart clone, showcasing my expertise in frontend development. Additionally, I led the development of a full-fledged Java-based job portal and a React-based movie review website, demonstrating versatility in utilizing various technologies. During an educational internship at Elite Softwares, I honed my frontend skills front end technologies.

What excites me about Cornerstone Company is the opportunity to work in an innovative environment that values continuous learning and growth. Your company's commitment to excellence aligns seamlessly with my aspirations, and I am eager to contribute my skills and passion for web development to your esteemed team.

Thank you for considering my application. I am enthusiastic about the prospect of contributing to Cornerstone Company's success and look forward to discussing how my skills align with your team's goals in more detail.

Sincerely,  
Ankita Jagtap
